

Eshagh Shafaei

Security Engineer | Cyber Defense & SOC Specialist

eshaghshafaie333@gmail.com • +39 351 577 4485 • Padova, Italy • [linkedin.com/in/eshagh-shafaei](https://www.linkedin.com/in/eshagh-shafaei)

PROFESSIONAL SUMMARY

Security Engineer with 5+ years of hands-on experience in cyber defense, SIEM operations, incident response, and secure architecture design. Currently completing an MSc in Computer Science (Security Track) at the University of Padua. Proven track record implementing SIEM/SOC workflows, automating security monitoring with Python, and conducting vulnerability assessments across IT environments. Passionate about Cyber Threat Intelligence, cloud security, and GRC frameworks (OWASP, NIST, ISO). Fluent in English (C1) and conversational Italian, eager to grow within Deloitte Cyber's Security Architecture team.

PROFESSIONAL EXPERIENCE

Cyber Security Engineer | KITWP (Online Education Platform) | Nov 2023 – Jan 2026 | Remote

- Monitored threat activity and performed continuous log analysis using SIEM tools, supporting full SOC/CERT workflows and incident response.
- Designed and enforced network security policies via firewall rule management and VPN configuration hardening.
- Identified and patched 50+ vulnerabilities across Windows and Linux environments through hands-on penetration testing and audits.
- Developed Python automation scripts for security monitoring, alerting, and response acceleration, improving SOC efficiency.

Security Analyst | KITWP | Dec 2019 – Oct 2023 | Kashan, Iran

- Secured an e-learning platform with 10,000+ active users, implementing layered defenses across application, network, and infrastructure levels.
- Shipped 35+ secure PHP backend modules with hardened authentication mechanisms, aligning with OWASP Top 10 and NIST guidelines.
- Defined and documented security architecture patterns, risk assessments, and incident management processes (Cyber GRC).

Junior Software Engineer | IthemelandCo | Jan 2018 – Dec 2019 | Kashan, Iran

- Engineered 18+ custom modules and identified/patched security vulnerabilities before production deployment.
- Built responsive themes and backend plugins, gaining deep understanding of secure development lifecycle practices.

EDUCATION

MSc Computer Science - Security Track | University of Padua | Oct 2023 – Apr 2026

Focus: 5G O-RAN Security, Protocol Fuzzing, Network Security, Web Developing

ERASMUS+ International Mobility | Norway (NTNU) | Aug – Dec 2024

Advanced coursework in network infrastructure security and cyber defense

BSc Computer Engineering | Azad University of Kashan | Jan 2018 – Feb 2022

KEY PROJECT

5G O-RAN Security Fuzzing Tool (Sep 2025 – Apr 2026)

Built a high-speed C++ protocol fuzzing tool for 5G network software testing, achieving 4,000× performance improvement over baseline. Discovered 8 critical vulnerabilities including 5 zero-days, directly applicable to Cyber Defense and Threat Intelligence engagements.

TECHNICAL SKILLS

Cyber Defense & SOC: SIEM • UEBA • EDR • IDS/IPS • SOC workflows • Incident Response • SOAR concepts

Threat Intelligence & GRC: CTI analysis • MISP • Risk Management • OWASP • NIST • ISO • Compliance

Cloud & Network Security: AWS security • IAM • VPN/Firewall • DNS/VLAN • Packet analysis • 5G/O-RAN

Programming & Automation: Python (security automation) • Bash • PowerShell • PHP • Exploit scripting

Platforms & OS: Linux/Kali Linux • Windows • Malware analysis • Encryption fundamentals

Languages: English C1 (fluent) • Italian A2 (learning) • Persian (native)
