

Eshagh Shafaei

Full-Stack Software Engineer | Security-Minded Developer

eshaghshafaie333@gmail.com | +39-3515774485 | Padova, Italy | linkedin.com/in/eshaghshafaei

PROFILE

Full-stack software engineer with 6+ years building, shipping, and scaling web platforms end-to-end, from responsive frontends and RESTful APIs to cloud infrastructure and database design. Delivered production systems serving 10,000+ users, including a custom CMS and e-learning platform built from the ground up. Comfortable across the full SDLC: architecture, development, testing, deployment, and SEO/performance optimisation. Brings a valuable secondary strength in application security and secure coding practices.

EXPERIENCE

Full-Stack Engineer & Platform Lead — KITWP (E-learning Platform) *Dec 2019 – Jan 2026 - Hybrid / Remote*

- Built and scaled a custom CMS and e-learning platform from zero to 10,000+ active users, taking full ownership of architecture, backend (PHP/Laravel), frontend (JavaScript/HTML/CSS), and database (MySQL).
- Continuously shipped new features across both frontend and backend: designed and deployed 35+ product modules covering user management, course delivery, payment flows, and content tooling.
- Improved site performance through frontend optimisation and caching strategies; collaborated closely on UX iterations to improve learner engagement and conversion.
- Wrote Python and Bash automation scripts for monitoring, reporting, and deployment tasks, reducing manual overhead and improving team efficiency and patched 50+ vulnerabilities, and maintained OWASP-compliant backend design.
- Created and delivered full-stack web development curriculum for 10,000+ global learners, translating complex technical topics into practical, job-ready projects.

Freelance Web Developer & SEO Specialist — Ponisha (Contract) *Jan 2021 – Dec 2022 - Remote*

- Developed and maintained client websites using Laravel (backend) and JavaScript (frontend), delivering custom features and performance improvements on tight deadlines.
- Executed technical SEO audits, resolved structural bottlenecks, improved page load times to under 3 seconds, and achieved first-page rankings for 200+ target keywords.
- Grew one client's organic revenue from zero to 200,000,000 Rial/month through a combination of on-page optimisation, content strategy, and technical fixes.

Junior Full-Stack Developer — iThemelandCo *Jan 2018 – Dec 2019 - Kashan, Iran*

- Engineered and shipped 18+ custom website modules, WordPress plugins, and responsive themes, working across both frontend (HTML/CSS/JS) and backend (PHP/WordPress).
- Led frontend and backend troubleshooting on live projects, diagnosing and resolving complex bottlenecks to restore performance under production pressure.
- Fortified site security pre-deployment: identified vulnerabilities and implemented fixes across client codebases, laying the foundation for a security-conscious engineering approach.

TECHNICAL SKILLS

Frontend	HTML - CSS - JavaScript (ES6+) - Responsive design - UI/UX collaboration
Backend	PHP - Laravel - Python - REST API design - Node.js basics - MySQL / SQL Server
DevOps & Cloud	AWS - Linux servers - Bash/PowerShell - Git - CI/CD concepts - Docker basics
CMS & Platforms	WordPress (theme & plugin dev) - Custom CMS architecture - SEO
Security	OWASP - Secure auth design · Vulnerability assessment · SIEM basics · IAM
Practices	Agile/Scrum · Full SDLC · Code review · Unit testing · Technical documentation

CERTIFICATIONS

Google Cybersecurity Professional Certificate *Google / Coursera* *Achieved*

EDUCATION

MSc Computer Science - Security Track	University of Padua, Italy	2023 – 2026
ERASMUS+ Exchange	NTNU, Norway	2024
BEng Computer Engineering	Azad University of Kashan, Iran	2018 – 2022

NOTABLE PROJECT

5G O-RAN Security Fuzzing Framework (C++) - MSc thesis project, Built a high-speed testing tool that improved test coverage 4,000× and uncovered 8 critical vulnerabilities including 5 zero-days, demonstrating deep systems thinking and a rigorous approach to code quality.
