

Eshagh Shafaei

Software & Security Engineer MSc Computer Science
eshaghshafaei333@gmail.com | +39-3515774485 | Padova, Italy | <https://www.linkedin.com/in/eshaghshafaei/>

PROFILE

Computer engineer and MSc student with 6+ years of experience building and securing large-scale web platforms. Passionate about digital transformation, cloud-native architectures, and emerging technologies including AI/ML, blockchain, and data analytics. Strong software engineering foundation across the full SDLC, from architecture design to production deployment, combined with hands-on knowledge of cybersecurity and secure development practices. Eager to contribute to Deloitte's Technology & Transformation practice supporting financial-services clients in Milan.

EXPERIENCE

- Software & Security Engineer** – KITWP 11/2023 – 01/2026 · Remote
 - Designed and delivered Python-driven automation services and REST-based backend modules, cutting operational overhead and accelerating release cycles, directly applicable to Agile delivery in financial services.
 - Architected and maintained AWS cloud infrastructure using microservices patterns, serving 10,000+ active users across production environments with high availability.
 - Integrated AI-driven analytics and data pipelines to automate security monitoring, gaining hands-on experience with ML tooling and data-centric engineering.
 - Worked end-to-end across the SDLC, requirements, design, development, testing, deployment, in close collaboration with cross-functional product and engineering teams.
- Security Analyst & Backend Developer** – KITWP 12/2019 – 10/2023 · Kashan, Iran
 - Delivered 35+ secure PHP backend modules and hardened APIs; applied OWASP and NIST principles throughout, building strong fluency in secure software design.
 - Designed the full platform architecture, database schema (MySQL), API layer, frontend delivery, gaining broad experience in end-to-end system design and client-server architecture.
 - Conducted deep code audits, discovering and remediating 50+ vulnerabilities; developed a rigorous, detail-oriented approach to code quality and correctness.
- Junior Software Engineer** – IthemelandCo 01/2018 – 12/2019 · Kashan, Iran
 - Engineered 18+ custom modules; diagnosed and resolved frontend and backend bottlenecks on live projects, building solid foundations in software craftsmanship and delivery.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Python (automation, data scripts), Angular(basic), PHP, Bash/PowerShell
Architecture & Cloud: AWS, Microservices, Client-server, Docker basics, CI/CD, Linux, MySQL / SQL Server
Emerging Technologies: AI/ML integration, Cybersecurity (SIEM, OWASP, IAM), Blockchain concepts, Data Analytics, ERP awareness (SAP/Oracle)
Methodology: Agile/Scrum, Full SDLC, Security-driven development, NIST, ISO, Risk Management

CERTIFICATIONS

Google Cybersecurity Professional Certificate - Google 05/2026

EDUCATION

MSc Computer Science - University of Padua, Italy 10/2023 – 04/2026
Erasmus+ Exchange - NTNU, Norway 08/2024 – 12/2024
BEng Computer Engineering - Azad University of Kashan, Iran 01/2018 – 02/2022

KEY PROJECT

- 5G O-RAN Security Fuzzing Framework (C++)** – MSc Thesis 09/2025 – 04/2026 ·
 - High-speed security testing tool for 5G network software: improved coverage 4,000× and uncovered 8 critical vulnerabilities including 5 zero-days. Demonstrates the same systematic, analytical approach needed for complex client-facing engineering engagements.

LANGUAGES & AVAILABILITY

English (C1 – Fluent) **Italian** (A2 – improving actively) **Persian** (Native) · Full availability for business travel
